

4
country

The Country 4 is the smallest model in the wood & multi-fuel room heating collection, yet still incorporates the ingenious features of the larger stoves. It is a neat, sturdy, yet graceful little fire and, with an output of around 4kW, still exudes a handsome amount of heat. The single door gives a complete and clear view of the fire and features a spinning primary air wheel for optimum control over the burning rate. In spite of its size, the Country 4 takes a decent sized log length of 330mm (13") making it a very popular

choice in the small stove market. An optional back boiler can be fitted to heat your domestic hot water or a couple of small radiators. We also offer an easily fitted drop-in riddling grate should you wish to burn coal or smokeless fuels. A small clip-on front shelf can also be fitted and we now offer an optional decorative front fence for a more traditional look. The stove is available in a choice of stunning Charnwood colours (see page 56) and finished with touches of solid brass and a turned wooden door handle: an all round faithful friend.

This model is also available as an electric version. See page 56

Top: Almond Country 4 • Opposite Black Country 4 with optional decorative fence • Above L-R • Country 4, with optional shelf, with optional decorative fence, optional drop-in grate • Further specifications on page 53
